<p>Detergent compsn. contains a petroleum hydrocarbon solvent(s). It      more pref. contains additionally one or a mixt. of lower alcohols and      alkylene glycol mono-lower-alkyl ethers.      Pref. the lactic ester is pref. one or a mixt. of methyl, ethyl and      butyl lactates. The blend ratio of the lactates is usually 5-50 wt.%,      pref. 10-40 wt.%. Available surfactants include higher fatty acid salts,      phosphoric ester salts, sulphuric ester salts, quat. ammonium salts      and fatty acid alkanol amides. The blend ratio of surfactants is      usually 10-70 wt.%, pref. 20-60 wt.%. Other available ingredients      include methanol, 3-methyl-3-methoxybutanol, propylene glycol      monomethyl ether, paraffin and aromatic hydrocarbons.      USE/ADVANTAGE - The compsn. has high storage stability,      detergency, resoiling-preventing performance and safety, even      without halogenated hydrocarbon and petroleum solvents.
